PRIVYSEAL®

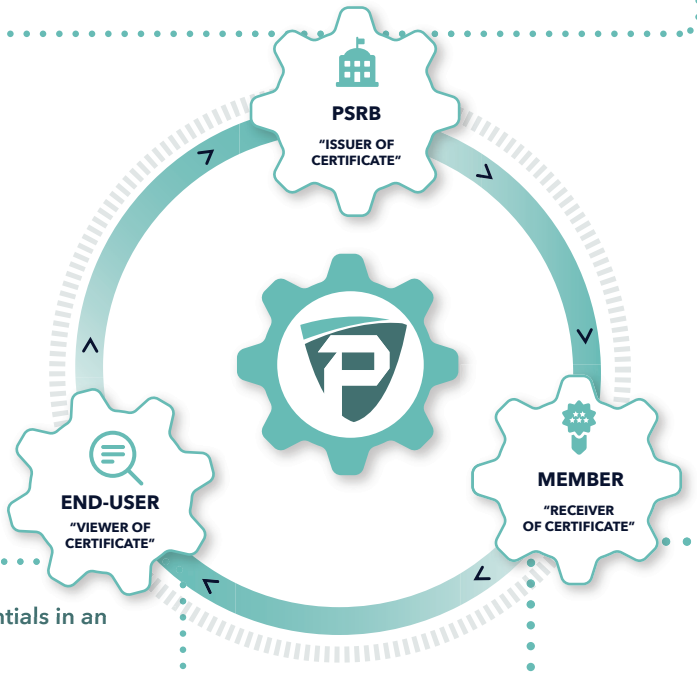

Visible digital confidence in an instant

PROFESSIONAL BODIES

Recognising professionals, protecting designations

Privyseal's powerful digital credential service makes qualifications, membership, licensing and other key claims available using real-time seals and certificates. This helps you to protect your professional standards and designations; whilst empowering your professionals to showcase digital credentials anytime, anywhere.

- Reduced cost of certificate creation and provision
- Automated issue, revocation and re-issue
- Protects brand, designations and associated standards
- Increased marketing opportunity as members using branded seals and certificates
- Drives registration and fee income/ CPD training
- Increased data integrity in line with GDPR requirements
- Reduction in resources required to handle external verification requests
- Strengthened relationships with members, HEI's and employers

We recognise that Professional, Statutory and Regulatory Bodies (PSRBs) are a very diverse group of professional and employer bodies, regulators and those with a statutory authority over a profession or group of professionals. To reflect this the PrivySeal solution is focused on providing dynamic credentials whereby certification and other digital documents are issued, revoked and re-issued depending on an individual PSRBs eligibility criteria, such as membership end date, payment of fees, and completion of CPD requirements. This allows credentials to be controlled by the issuer protecting themselves from individuals who do not meet the relevant standards.

Digital credentials can be processed, produced and delivered much faster than paper-based documents and the prospect of certificate alteration, fraud, identity theft and potential regulatory failure is dramatically reduced. The seals can be embedded in e-mails, websites and documents and linked to the certificate/ document image that is updated in real time (a PrivySeal and certificate example is shown below). This provides a range of direct benefits to PSRBs, its members, employers and other stakeholders that they are presented to.

- Verify credentials in an instant
- Reduced resources required for credentials verification
- Facilitates quicker decision making
- Strengthened relationship with the PSRB
- Protects against identity theft and fraud.

- Easy sharing of verifiable credentials (anytime, anywhere)
- Professional showcasing of genuine and current expertise
- Competitive advantage over non-members/ non-compliant members
- Faster re-issuing of credentials
- Protects reputation and combats identity theft

CASE STUDY

SOUTH AFRICAN INSTITUTE OF PROFESSIONAL ACCOUNTANTS (SAIPA)

Certificate of Membership
